

DAR003 - Indirect Air Heater

Unit Name: DAR003
 Type: Cube
 Capacity: 1 million BTUs (1.1 million kJ)
 Skid mounted
 Uses No. 2 (diesel) fuel

Clean, dry, heated air

A comfortable and safe work space for people, products, and materials.

Specifications

Greatest Dimensions

Length	73 in	1854 mm
Width	48 in	1219 mm
Height (including stack)	84 in	2134 mm
Outlet	Round	18 in 457 mm
Size of Duct Work	18 in	457 mm
Maximum Outlet Temperature *	350°F	177°C
Voltage	120V 1Ø	
Ampacity	20 Amp	
Fuel Type	No. 2 fuel oil	
Recommended generator size	6kW	

*Factory set, can be adjusted on request.

Rental includes:

- Site and installation planning, increasing the odds of a smooth start and successful on-going service.
- Hook up of the power and fuel, saving your people's time and removing risk in the installation.
- Training of your personnel on the basic operation of the heater so that they can handle it with confidence.
- One-on-one education for your mechanic on diagnostics skills and preventative maintenance.
- On-call service 24x7 for the entire rental period.

Prior to arrival at your site, the heater is overhauled and tested to ensure reliability and quality of performance. The heater is equipped with a 3-phase voltage monitor to prevent damage from misconnection, making reconnections practically foolproof.

To rent a heater or to discuss your project, call **780-955-3839** or email chrisb@desertairheaters.com .
